Part 5 - y isolated on the left of the equal sign.

1)	4)
$y = x \cdot z$	$y = x \cdot t + z$
2)	5)
$y = \dfrac{z}{x}$	$y = \dfrac{2x}{z^2}$
3)	6)
$y = \dfrac{x}{z}$	$y = \sqrt{\left(\dfrac{2x}{z}\right)}$
